

PRESS RELEASE
ASPR-042022-01 There's a new Haas in town

There's a New HAAS in Town!

The recently build Aerosystems facility is filling up quickly. A new HAAS ST-25Y CNC Lathe Machine was delivered this month. And it's being installed as this post is being written. Aerosystems is on track to move in and start up new operations as planned. This latest arrival at our manufacturing facility in Angera represents an important investment in Aerosystems operations. Despite the challenges that the last pandemic has presented, demand for Aerosystems machined products continues to increase and the purchase of a new CNC lathe reflects this.

The new HAAS ST-25Y is a robust, high-performance turning center with a wide selection of options. This machine to provide setup flexibility, extreme rigidity, and high thermal stability.

Completely redesigned, the ST-25Y turning center to provide even more performance, features, and value than ever before. The new machine was re-engineered everything – from the ground up – to create a more rigid machine, with superior cutting performance, and a host of productivity-enhancing options: new castings – more compact and more rigid, 11% smaller footprint than its predecessors, Increased Z-axis travel, Auto Door, WiFi standard and Industry 4.0 and Made in the USA.

*Our new HAAS CNC machine ST-25Y is "sitting pretty" closer to her sister ST-15Y in our workshop.
The Owners of Aerosystems in the picture: Paola Costa and its sons Davide and Stefano Zambra.*

Aerosystems – Precision Aerospace Components is a full-service, family-owned company specializing in the manufacture of precision parts and assemblies for the aerospace market. Our experienced staff can rapidly take a project from concept or prototype to finished assembly, giving customers a competitive market advantage.
