PRESS RELEASE
ASPR-240524-01 Aerosystems selected for Airbus A220

AEROSYSTEMS Chosen by AIRBUS to Supply Air Diffusion System for the A220 Program

Aerosystems S.r.l. is proud to announce its selection by Airbus to supply Electromechanical Devices and Environmental Control System (ECS) Components for the A220 Family of aircraft. This prestigious award marks the inaugural collaboration between Aerosystems and Airbus and signifies a significant milestone for the company.

Drawing upon decades of expertise in developing aviation components, Aerosystems will introduce cutting-edge solutions for the Airbus A220, featuring the latest materials and technology to enhance the flying experience. These enhancements encompass a modern, updated design, optimized air outlets, and other improvements aimed at reducing weight and fulfilling program objectives.

“We have an extensive history of providing components solutions to our commercial aircraft manufacturer customers. Establishing this partnership with Airbus marks a significant milestone for Aerosystems, and we are enthusiastic about collaborating with Airbus teams to deliver advanced products for the A220 Program. We are grateful for Airbus’s trust in us and eagerly anticipate fostering a long-term relationship on this Program” remarked Stefano Zambra, CEO and Owner of Aerosystems.

About Aerosystems:

Aerosystems S.r.l. has established a strong presence in both the Italian and international aerospace markets, strengthened by its new young management team through the introduction of new technologies, energies, and expertise. As an innovative engineering and manufacturing company, Aerosystems specializes in the design and production of high-performance, highly reliable build-to-print electromechanical devices, primarily for the aerospace market.

Innovation, combined with Aerosystems' extensive know-how and expertise, has facilitated the establishment of relationships with highly specialized aerospace companies. Embracing new challenges and continually finding innovative solutions are core elements of the company's ethos. This approach promotes constant updating and ensures that Aerosystems remains a reliable and safe partner for its clients.

For over 80 years, Aerosystems has been delivering creative, customer-centric solutions with exceptional responsiveness. Global airframe and helicopter manufacturers, among others, rely on the collaborative spirit and innovation of Aerosystems. The company's strategic vision entails enhancing its value proposition by developing technologies and capabilities that offer innovative solutions to its targeted markets.
